

3D Male Rejuvenation

PRICE LIST • 2016

renewal institute
incorporating
skin • body • health • brain • sleep
the complete medical solution

3D Male Rejuvenation

At Skin and Body Renewal we appreciate that the stresses of life can take their toll on sexual performance - an element that significantly affects your sense of overall wellbeing. With increased demand for help in this area, we have introduced the 3D Male Rejuvenation programme. Impaired blood supply usually due to various medications, chronic diseases and ageing is the culprit in roughly 50% of the cases of erectile dysfunction. The core treatment of this programme uses Carboxytherapy to improve circulation and blood supply to the penis by stimulating the production of new capillaries.

Carboxytherapy for 3D Male Rejuvenation From R850 (per treatment)

The following benefits have been reported after Carboxytherapy treatments for male sexual dysfunction:

- Improved cosmetic appearance as tissues regains plumpness.
- Improved strength and size due to improved circulation.
- Improved functionality i.e. tissue turgor due to improved circulation.
- Improved sensation of the area.

Owing to the sensitive nature of this programme, a trained medical doctor performs the treatments. Details are kept private and confidential. The treatment schedule involves an initial consult where your doctor will take a thorough history and may request certain blood tests to be done. If you are a suitable candidate, you can begin the 3D Male Rejuvenation programme which includes 6-10 weekly treatments, lasting around 15 minutes per treatment, and a maintenance plan of 1-2 treatments per month after that.

3D Male Rejuvenation

3D Body Renewal

From R3 750 (per treatment)

Obesity can eventually lead to non-insulin dependent diabetes, hypertension and high cholesterol levels which all contribute to male sexual dysfunction. Our signature body shaping treatment, 3D Body Renewal, is one of the most effective body shaping solutions available and reduces dangerous intra-abdominal and exercise resistant fat. It involves combining five clinical applications: Ultrashape, Radiofrequency, Carboxytherapy, Manual Lymph Drainage and Body Renewal Lite, a body sculpting eating programme. If the programme is strictly adhered to, a weight loss of 10kgs and a 12cm circumferential reduction in 4 weeks is possible.

Body Renewal Medical Weight Loss Programme

From R1 300

Obesity affects insulin sensitivity and can eventually lead to non-insulin dependent diabetes. Raised sugar levels together with hypertension and high cholesterol levels contribute to erectile dysfunction. For this reason, the Body Renewal Medical Weight Loss System, an HCG diet and medical weight loss program that treats the cause of obesity may be suggested by your doctor as a medical weight loss solution to assist with the 3D Male Rejuvenation Programme. It is a safe and effective weight and fat loss program that has evolved over ten years of experience in the weight loss industry. If the weight loss programme is strictly adhered to, 10 to 12kgs of resistant fat can be safely lost in 4 to 6 weeks.
