Signature Rejuvenation

The majority of us will always be interested in shortcuts to a youthful appearance, but not everybody is willing to consider the surgical options. Skin Renewal has revolutionary non-surgical treatments that can deliver dramatic results in a short space of time. These preventative, non-invasive treatments stop the ageing process before it starts. If you feel that your skin requires more intensive treatments, please schedule an appointment with the aesthetic doctor to determine which medical aesthetic treatment should be prescribed.

3D Skin Rejuvenation™

Skin Renewal's signature laser treatment is one of the most effective non-ablative skin rejuvenation solutions available. It addresses sunspots, redness, spider veins, wrinkles, shallow and sagging skin, with no downtime. After consultation with an aesthetic doctor, a package with a customised solution will be recommended.

As best results are usually seen after 6 to 12 treatments, every client is provided with a yearlong solution dependent on budget and expectations. Each treatment has prolonged effects, so a monthly treatment can be given over a period until the desired result is achieved. The effect of each treatment is accumulative with best results visible down the line.
